RHEEM IS AUSTRALIA'S FAVOURITE NAME IN HOT WATER AND THE NAME AUSTRALIANS HAVE TRUSTED FOR GENERATIONS

YOU'LL BE RIGHT WITH RHEEM

No.1 with Australian families. Rheem is Australia's favourite hot water system... and it's been that way since 1939, when Rheem started making water heaters in Australia. Generations of Australian families have relied on Rheem for water that is steady, hot and strong!

RHEEM IS EVERYWHERE

There is an unequalled network of experienced Rheem service agents across the country. No matter where you are in Australia there is expert advice available to ensure that you get the Rheem solution that is right for you.

WE HAVE THE RIGHT RHEEM FOR YOU

Rheem has the most extensive range of hot water systems available in Australia. Solar, gas or electric storage. Continuous flow or heat pump. Energy efficient. Rheem has a range of capacities and sizes just right for every situation.

Solar, gas or electric.
Continuous flow, heat pump
or storage. Rheem has a
range of hot water solutions
for every situation.

CHOOSING THE RIGHT CAPACITY RHEEM FOR YOUR HOME

Many households change over time, so it's important to choose the right capacity to meet your needs both now and as your family grows.

Factors to consider in determining your hot water needs:

- Number of bathrooms or people using hot water at once.
- Adults and children in the home (teenagers will use more hot water than young children).
- Dishwashers or washing machines connected, that use hot water at the same time.
- Will a large bathtub or spa-bath be filled using hot water?

Your hot water system needs will be influenced by the water conditions, climate and water pressure in your region.

RHEEM SOLAR HOT WATER

SOLAR THAT SAVES

Solar water heaters come in both roof and ground mounted systems to suit various applications with a choice of either electric or gas back-up boosters for days when the sun doesn't shine. There are even models suited to particularly cold areas, which mean every family can enjoy the benefits a solar water heater has to offer.

SMALL-SCALE TECHNOLOGY CERTIFICATES

Small-scale Technology Certificates (STCs) are a financial incentive to encourage the installation of solar water heaters provided under a Federal Government operated scheme.

This map shows the climate Zones within Australia which will define the number of STCs allocated to an approved solar water heater.

To claim your STC entitlement, simply complete the STC Assignment form.

WHY RHEEM SOLAR

Energy efficient – uses up to 70% less energy than an electric water heater, saving you money.¹

Reduces carbon emissions – solar systems save up to 3.3 tonnes of greenhouse gas emissions every year.⁴

Minimise reliance on fossil fuels and protect yourself against future energy cost increases – take advantage of Australia's abundant supply of sunlight, and reduce your reliance on expensive, non-renewable gas and electricity.⁵

Complete range – the Rheem solar range includes both split, ground mounted systems and complete roof mounted models in a variety of capacities from 160 – 410 Litres.

All weather protection – Rheem Premier® Loline series feature unique, drain-back heat exchange technology, that prevents the solar system from freezing, or overheating during weather extremes.

Booster options – Rheem solar systems are available with electric or gas boosting, providing hot water during cloudy weather, or at night.

Eligible for rebates & incentives – STC and State Government rebates are available for installing solar water heating.⁶

Visit www.rheemsolarsavers.com.au to find out how many STCs apply to Rheem Solar water heaters by zone and to download the STC Assignment form.

HOW SOLAR WORKS

Solar water heaters work by absorbing energy from the sun's rays in the roof mounted solar collectors and transferring this to heat water stored in the tank. Ground mounted systems rely on inbuilt pumps to push the water through the system, whereas roof mounted systems rely on a natural 'thermosiphon' effect. Typically water passes through channels in the solar collector where the water is heated. As the water moves out of the collector and into the tank, the tank gradually gets hotter until the water reaches its maximum stored temperature.

THE RIGHT RHEEM FOR YOU

GROUND MOUNTED SYSTEMS

Model Number:
591270/2T

Premier® Loline

- Indirect design with complete frost protection - ideal for even the coldest of climates.
- Features drain-back heat exchange technology, assuring you of reliable solar performance in any weather extreme.
- Electric boost and integrated or remote Gas boost models available.
- The split design reduces the structural load on your roof.

Model Number:
511340/2HBT

Loline

- The multi-riser solar collectors efficiently absorb energy from the sun.
- Economical to buy.
- Automatic, electronic controls maximise solar gain.

ROOF MOUNTED SYSTEMS

Model Number:
52H300K/2S

Premier® Hiline

- Features an indirect heat exchange design, ensuring reliable operation in any climate.
- Lightweight and durable stainless steel tank cylinder.
- Space saving roof mounted installation.
- Suitable for use with most water quality types.

Model Number:
52S300/2NPT

Hiline®

- Ideally suited to warmer climates.
- Does not require pumps and controllers.
- Relies on water moving through the solar collectors and into the tank using energy absorbed from the sun.

RHEEM HEAT PUMP HOT WATER

NEXT GENERATION SOLAR

Traditionally solar water heaters have proven themselves to be an energy efficient renewable water heating alternative to gas and electric systems, and while solar systems are still an efficient way to heat water, heat pumps save equivalent amounts of energy and greenhouse gas emissions to electric boosted solar systems.

Works day and night,
as they don't rely on
daylight to operate.

WHY RHEEM HEAT PUMP?

Energy efficient – cuts energy use and greenhouse gas emissions by up to 65%.¹⁰

No solar collectors – reduces structural load on your roof, can be used where roof collectors aren't suitable.

Replacement for electric water heaters – uses the same plumbing and electrical connections as an electric water heater, making it an ideal upgrade from a standard electric water heater.

2 piece design – results in a reduced handling weight, making it easy to deliver and install on site.

Easy to install – can be fully installed by plumbing trades.

Back up element fitted in every model – delivers hot water even on the coldest of winter nights.

Eligible for rebates and incentives – Rheem Heat Pumps are eligible to receive Small-scale Technology Certificates (STCs) and State Government Rebates.¹¹

When suitable, product can be connected to lower cost tariff – which helps reduce running costs.^{8, 12}

5 year warranty.⁹

SMALL-SCALE TECHNOLOGY CERTIFICATES

Small-scale Technology Certificates (STCs) are a financial incentive to encourage the installation of solar water heaters provided under a Federal Government operated scheme.

This map shows the climate Zones within Australia which will define the number of STCs allocated to an approved solar water heater.

To claim your STC entitlement, simply complete the STC Assignment form. Visit www.rheemsolarsavers.com.au to find out how many STCs apply to Rheem Heat Pumps by zone and to download the STC Assignment form.

HOW A HEAT PUMP WORKS

Rheem Heat Pumps deliver hot water by efficiently utilising a free and abundant source of energy – the heat that is in the air around us. Refrigerant vapour compression technology enables the heat pump to intensify this heat, which is used to produce hot water. Rheem Heat Pumps are more efficient during warmer months, and will operate for less hours during the day than in colder months of the year. See illustration below.

When power is available, the Heat Pump heating cycle will continue until the tank is full of hot water.

THE RIGHT RHEEM FOR YOU

Model Number:
551310

HDi-310

- Top Down Heating delivers 60°C hot water in almost an instant.
- High heating power means fast recovery to provide all the hot water you'll need.
- Interconnecting design fits onto a standard outdoor electric water heater footprint.
- Suitable for cold climates.

Model Number:
551325

MPi-Series

- Heat Pump module is located well below the fence line, which keeps noise away from windows.
- Whisper technology enables quieter operation.
- Two piece interconnecting design allows for easy one-man installation.
- Most economical to buy and install.
- Ideal upgrade for an electric storage water heater, featuring common connections.
- Available in RheemPlus® 50°C temperature models.
- Suitable for warm and tropical climates.

Model Number:
561325

MPs-Series

- The tank and module can be separated by up to 4 metres, allowing you to install the tank inside a garage or laundry space.
- The Heat Pump module suits wall or slab mounting to make the best use of available space.
- H₂O connections are environmentally responsible, as there is no risk of refrigerant escaping from them.
- Suitable for warm and tropical climates.

RHEEM ELECTRIC STORAGE HOT WATER

MAINS PRESSURE HOT WATER

Rheem Electric Storage Water Heaters are ideal for use with money saving off-peak energy tariffs and are available in a range of capacities to suit most needs. Best of all, Rheem Electric Storage Water Heaters come with the Rheem Mains Pressure Advantage built in. Rheem Mains Pressure water heaters heat water and store it so that it's ready as soon as you need it. This ensures full pressure to multiple outlets all at the same time.

Electric storage systems are a relatively inexpensive solution to your hot water needs.

WHY RHEEM ELECTRIC STORAGE?

Designed for Australia's tough conditions, using over 70 years of experience in Australia.

Ideal for use with economical off-peak energy tariffs.

7 or 10 year warranty models available.^{13,14}

Sizes to suit every family size and hot water requirement starting from 25L.

Mains Pressure water delivery for steady, hot and strong hot water.

Indoor models available.

Full technical support through Rheem's National Service Network.

OFF-PEAK OR CONTINUOUS ELECTRICITY?

Rheem electric storage hot water systems are suitable for connection to either "off-peak" or "continuous" electricity tariffs depending on the model selected (refer to table opposite for comparison).

Off-peak electricity is a lower running cost option that is available to you and uses electricity to heat your water overnight during low demand, 'off peak' times. Once heated, the water is then stored in your insulated tank for use during the day. Off-peak electricity is only available for storage hot water systems with a 160 Litre capacity or greater, depending on your local electricity supplier (125 Litre capacity for South Australia).

Continuous electricity is where power is available to heat the water 24 hours per day. A smaller tank can often be used but the running costs will be higher.

Consult your energy provider for more information on tariff arrangements and cost comparisons.

CHOOSING THE RIGHT CAPACITY RHEEM FOR YOUR HOME

Many households change over time, so it's important to choose the right capacity to meet your needs both now and as your family grows.

Factors to consider in determining your hot water needs:

- Number of bathrooms or people using hot water at once.
- Adults and children in the home (teenagers will use more hot water than young children).
- Dishwashers or washing machines connected, that use hot water at the same time.
- Will a large bathtub or spa-bath be filled using hot water? Your needs may also depend on the climate and water pressure.

- 50°C maximum temperature delivery¹⁵
- Single element
- Left hand connection
- Available in 125L, 160L, 250L & 315L capacities

RHEEM GAS STORAGE HOT WATER

MAINS PRESSURE HOT WATER WHEN YOU NEED IT

Mains pressure gas storage water heaters deliver hot water instantly, as they keep a generous quantity stored hot and ready for your use. As they are at mains pressure, you can be sure of a strong flow of hot water, and the ability to service multiple showers or hot water needs at once. A choice of 4 and 5 Star models, in a range of capacities means there is a model for every budget and family. And should you ever run short, Rheem's high recovery models will have you back in hot water fast.

5 Star energy efficient
Rheem Gas Storage water
heaters are good for the
environment.

FACTORS TO CONSIDER:

Purchase, Installation and Running costs:

- Gas Storage systems are a relatively inexpensive solution to your hot water needs. There is a Rheem model to suit just about every budget. If replacing an existing gas unit, there is probably a Rheem model which can simply be installed in the same space.
- Higher efficiency Gas Storage water heaters cost less to run. As a guide, every extra energy-rating star represents approx 7% less gas usage, which means savings in energy bills.

Capacity:

- Gas Storage heaters are rated by their storage capacity and also their "recovery rate". This is the quantity that can be fully reheated in one hour; the higher this rate the faster you can be back in hot water.

RHEEM CONTINUOUS FLOW GAS HOT WATER

CONTINUOUS HOT WATER WHEN YOU NEED IT

Continuous Flow gas water heaters deliver hot water that will never run out because they heat water when you need it, for as long as you need it. Continuous Flow water heaters work differently from storage water heaters, only heating on demand rather than heating and storing water until needed. 5 Star and better energy efficient Rheem Continuous Flow heaters are good for the environment. Mounted to the wall and taking up less space, they are ideal for a compact home site or apartment.

5+ Star energy efficient
Rheem Continuous Flow
for hot water that never
runs out.

WITH RHEEM YOU'RE IN CONTROL

Rheem delivers added safety by putting you in control of the hot water in your home.

Rheem Standard and Deluxe Electronic Temperature Controllers are optional on all models, allowing you to choose the exact temperature you need and to guard against scalding. Rheem Bathroom Controllers can be set up to 50°C. Deluxe Controllers also offer a “bath fill” mode, to turn off the water flow once the bath is filled.

WHY RHEEM CONTINUOUS FLOW?

Sizes to suit every home, apartment or family –
12L, 16L, 18L, 20L, 24L and 27L/minute capacities.²⁰

5 Star and better energy rating to save money and the environment.

Designed for Australia's tough conditions, combining international expertise with over 70 years of experience in Australia.

10 year warranty.²²

Flamesafe® overhear protection, which automatically shuts down your heater should it overheat.

Rheem EZ LINK® delivers up to 54L/minute by linking 2 Rheem units to act as one, thereby doubling capacity.²⁰

Rheem Q Factor™ for rapid hot water every time, without the fluctuation when multiple taps demand hot water, which can occur with some Continuous Flow units.

Family safety with electronic control for accurate and reliable water temperature, reducing the risk of scalding.

Electronic Remote Temperature Controllers for accurate setting of the ideal and safest temperature.

Solar ready Rheem 70°C capable models are compatible with solar systems without the need for special fittings.²⁵

Factory pre-set 50°C models available, requiring no tempering valve.²¹

Full technical support through Rheem's National Service Network.

Compact size for flexibility in design to suit every installation.

Available to suit either Natural Gas or Propane

Indoor 27L model available, with matched flue system.

DESIGNED TO DISAPPEAR

Your Rheem Continuous Flow water heater can be neatly hidden away to save even more space:

Pipe covers in matching colour will conceal all pipework.

Recess boxes will set your Rheem into the wall.

RHEEM WATER STAR® WATER SAVING SYSTEM

Rheem Water Star is a water-saving device suitable for use with all brands of continuous flow water heaters. It is an easy way to have faster hot water, minimise water wastage and reduce energy usage in the home.

Continuous Flow water heaters can waste water waiting for the heating mechanism to reach full temperature.

Independent research shows a Continuous Flow water heater in a typical home can on average waste between 1.2 and 2.5L of water when the hot water tap is turned on which equates to 135L per day.²⁴

By capturing cold/warm water for re-heating later, while releasing already-hot water for instant use Rheem Water Star ensures hot water flows immediately, saving water and energy.

Rheem Water Star is easily installed and comes with a 5 year warranty.²³ There is no extra electrical wiring, it has its own plug-in point for the water heater and is the same size as a Continuous flow water heater. Rheem Water Star cannot be installed with a 50°C Continuous Flow Water Heater or with remote temperature controllers.

A tempering valve may be required to be fitted in accordance with AS/NZS 3500:4.

Warranty, terms and conditions

1. Energy reduction of up to 70% based on Australian Government Approved TRNSYS simulation modelling and apply when replacing an electric water heater with a Rheem Solar water heater in Zone 3.
2. **Rheem Premier® Loline / Loline / Hiline®** 5 year cylinder, heat exchanger and solar panels, 3 year labour on cylinder and heat exchanger, 1 year parts including labour. Applies to domestic installations only. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
3. **Rheem Premier® Hiline** 6 year cylinder, 5 year solar panels, 1 year labour on cylinder, 1 year parts including labour. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
4. Greenhouse gas emission savings based upon installing a 511340/2NPT Solar Hot Water heater, when replacing an electric water heater.
5. Any financial savings will vary depending upon type of Rheem Solar system installed, orientation and inclination of the solar collectors, type of water heater being replaced, hot water consumption and fuel tariff. Maximum financial savings off your hot water bill are achievable when replacing an electric water heater on continuous tariff.
6. Eligibility criteria apply. Rebates and incentive schemes are subject to change or cancellation without notice.
7. 591270 should be used with T200 solar panels in Victoria and South Australia.

MPi-410 only recommended for Nth NSW & QLD.

Warranty, terms and conditions

- The impact on an electricity account will depend on the tariff arrangement of the water heater being replaced and where you live. These Rheem Heat Pump water heaters (model dependant) are recommended for connection to either 24 hour continuous tariff or extended off peak (min 16 hours/day). Before purchase consult your energy provider for more information on cost comparisons.
 - Heat Pump warranty conditions. 5 year cylinder warranty, 3 year labour on cylinder, 2 year on sealed system including labour, 1 year on all other parts and labour. Applies to domestic installations only. Amended warranty may apply where a government rebate has been received for the solar water heater. Phone 131 031 for details. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
 - Energy and greenhouse gas emissions reduction of up to 65% based on Australian Government Approved TRNSYS simulation modelling and apply when replacing an electric water heater with a Rheem Heat Pump water heater in Zone 3.
 - Assumes consumer eligibility for rebates. Eligibility criteria apply. Rebates and incentive schemes are subject to change or cancellation without notice.
 - Any financial savings will vary depending upon type of Rheem Heat Pump installed, type of water heater being replaced, hot water consumption and fuel tariff.
- Maximum financial savings off your hot water bill are achievable when replacing an electric water heater on continuous tariff.

GLOSSARY OF TERMS

Recovery rate – the volume of water a heater can reheat in one hour. Measured as the volume of completely cold water (should the water heater be run completely out) that can be heated to 45°C over the cold water temperature.

First Hour Capacity – a measure of water heater capacity that combines both the stored hot water volume & the hourly recovery rate (eg: if a water heater has storage capacity of 130L and a recovery rate of 200L/hour, its First Hour Capacity is 330L).

Warranty, terms and conditions

- Based on 45°C temperature rise.
- 5 year cylinder warranty, 3 year labour on cylinder, 1 year parts and labour warranty on all other components for domestic (non-commercial) installations. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
- 7 year cylinder warranty, 3 year labour on cylinder, 1 year parts and labour on all other components for domestic (non-commercial) installations. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
- 10 year cylinder and SuperFlue warranty, 5 year labour on cylinder and SuperFlue, 1 year parts and labour warranty on all other components for domestic (non-commercial) installations. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty

GLOSSARY OF TERMS

Flamesafe® – a unique Rheem safety protection feature that automatically shuts down the continuous flow water heater should a fault develop.

Q Factor™ – a unique Rheem feature that keeps the heater in readiness so hot water delivery is as fast as possible, and at consistent temperature.

Warranty, terms and conditions

20. Guide only, subject to ambient water temperature and pressure, correct pipe sizing and appliance flow rates.

21. 50°C factory pre-set models supply hot water at a maximum 50°C at all outlets in accordance with AS3498. Some applications may require tempering, refer to AS 3500:4. 60°C models must have a tempering valve installed in accordance with AS 3500:4.

22. Warranty Conditions: 10 Years parts and 3 Years labour on Heat Exchanger, 3 Years parts & labour on other components, when installed in a domestic dwelling. For all other installations, the warranty period is 1 Year parts and labour on Heat Exchanger and other components. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty

23. Rheem Water Star warranty: 5 year supply on cylinder, 3 year supply & labour on cylinder, 1 year full parts & labour. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty

24. Average wastage incurred at water heater outlet per demand until water reaches within 5°C of 60°C set temperature, based on 19 demands per day, with the water heater cold each time tap is turned on and 200L/day average hot water consumption. Source: WELS Water Wastage of Instantaneous Gas Water Heaters – 2008. © Commonwealth of Australia 2008.

25. Applies to 70°C capable models when set to 70°C.
