Professional Tree Care

Trees are an exceptional resource, essential to our existence. Understanding the complex nature of this resource requires professional knowledge and ability.

The Tree Doctor has built a second-to-none reputation within the tree care industry over the past 20 years and is renowned both nationally and internationally for excellence in Arboriculture. We are proud of both our uncompromising work standards and relaxed and friendly customer service style. You can be assured that we only employ fully qualified arborists to carry out tree work and our company also carries all the necessary insurances.

The company and its staff hold memberships to the International Society of Arboriculture (USA), Arboriculture Australia (formerly ISAAC), Tree Care Industry Association (USA) and the Queensland Arboricultural Association.

The Tree Doctor has also been the recipient of the highly coveted National Arborist Association (USA) 'Grand Award of Excellence in Arboriculture' on two occasions. In 2002, for the transplant of two very large fig trees at Emerald Lakes/Birmingham Grove on the Gold Coast and again in 2005, for the relocation of a very large white fig at Hollywell on the Gold Coast. This particular tree weighed in excess of 200 tonnes.

Professional Tree Management for homeowners

The Tree Doctor can assist homeowners in building a program of professional tree management; designed to create and/or maintain a very personal 'tree scape'. Our services include:

- Specialist tree pruning to prevent storm damage and help preserve the natural shape of the tree.
- View/sunlight enhancement - specialist pruning techniques are used to improve views from the home without complete detriment to the existing 'tree scape' design.
- Fertilisation and aeration programs to keep your trees healthy, safe and strong.
- Soil and root zone management including 'Grow Gun' and soil injection of fertilizer and beneficial fungi.
- Specialised root pruning and root management to control damage to pathways, driveways and foundations.
- Annual tree management programs for both resident and non-resident property owners which include monthly and after-storm inspections and maintenance procedures, when required.
- Pest and disease detection and control.
- Structural and hazard inspection/assessment.
- Emergency tree and branch removal or repair resulting from storm damage.
- Tree and stump removal, when required.

The dedication and commitment of highly skilled staff, the range of specialised services, personal attention to detail and the guarantee of customer satisfaction that The Tree Doctor offers make the selection of a tree care company a simple and enjoyable experience.
