

Testimonials

Hello Michael,

I just wanted to write and say thank you for the great service The Termite Guys provided. From the first inspection to the installation of our Termite barrier, you and your team were so friendly, professional, helpful and polite. You all went above and beyond to provide great service, every step of the process was explained clearly and at no point did I feel pressured into buying the barrier.

My three year old had great fun following you around tapping the walls helping you carry out your inspection and you were kind enough to encourage him. Also I can't imagine many Termite companies would let me use their stud finder so I could hang up my tumble dryer or show me where my insulation was patchy in the loft with their thermal camera, but the icing on the cake was when one of your team (a former bricklayer) kindly repaired the three loose bricks under one of my windows using some left over concrete from the barrier installation.

Incredible work guys and I will recommend your company to anyone who needs a company like yours, your competition should be concerned.

Thanks,

Neil, Boronia Heights :-)
