G-TEC can provide you with advise on selecting the right alarm system and monitoring plan for your individual needs.

Back-To-Base Monitoring

Back-To-Base monitoring means that when an alarm is triggered at your premises, a signal is sent to a monitoring centre, either via the phone line, radio signal, internet or mobile digital pathways.

The monitoring centre then interprets the type of alarm and based on your instructions, responds accordingly, either by contacting persons you nominate, or by dispatching a Police, Fire or Security response.

Contact us today for advise or an obligation-free quote.
