All aspects of Electrical Installations, Maintenance and Repairs

To the Home Owner

Please find attached your Paperwork regarding your recent **Grid Connected Solar Installation.**

If you are receiving this letter today, you can be assured that the paperwork that your retailer requires for connection has been emailed to them today. This includes your **CES, EWR and Connection Form.** If you have any trouble with your retailer, who often claim not to have received the required paperwork, please do not hesitate to call us at WDES and we will promptly re-send the paperwork.

Solar Panel Maintenance

Western District Electrical is offering a Solar Maintenance Program to all solar customers. Obviously many people cannot safely access their roof to clean their panels. If panels do become dirty their performance drops significantly.

Due to DC voltages and current within your new Solar System it is important to maintain and check all connections on a regular 12 monthly basis. A regular Solar maintenance visit would include the following:

- Checking the operation of the system, including all voltages
- Checking all terminations of breakers and solar modules
- Cleaning panels using water and glass cleaner
- Tightening all module clamps and other associated bolts
- Assessment filled out and results kept for future reference

Many customers do not realise they have a problem until months down the track, missing out on a lot of financial gain

Let the sun work for you, keep your system up and running and on your roof!

Yearly visit = \$150inc GST

This price is within 30KM of Warrnambool, visits outside the area will be discussed with the customer.

To register please call WDES 0438 570 337 or email us at admin@wdelectrical.com.au

Regards,

Wayne Davies
