WEED /AWAY

FARM MONITORING PROGRAM YOUR SOLUTION AND PEACE OF MIND TO ONFARM WEED INFESTATIONS

As an addition to our road and farm spraying programs we here at **WEEDAWAY** now offer a service for new and existing clients to further enhance the potential of better and more lasting weed control on your property .

Now; rather than **you** monitor the growth of infestations on your land ; taking **you** away from more pressing tasks that require your attention ; sometimes putting the task of letting a contractor know they are ready to be sprayed ; or missing the best time for optimum control , **you** can leave the worrying to us as well as the spraying and get on with what **you** do best, managing **your** time and assets .

Benefits are many and you have the piece of mind in knowing that the job is being done correctly by professional people without the need to own and maintain expensive equipment that you may only use a few times a year. **WEEDAWAY** has a range of equipment to cover most on farm situations and if we haven't got the gear to satisfy your requirements we will direct you to a suitably qualified contractor in your locality for you to deal directly with.

We are happy to supply references of our services from existing clients on request and look forward to adding you to the list of satisfied customers. Spaces are filling fast and for the best result contact me early rather than later for a free assessment of your weed problems for an amicable solution.

- FREE assessment on your property of the problem
- On the spot Quotation with no hidden costs
- Treatment at the best time for chemical uptake
- Follow up check within 14 Days to assess results
- Monitoring as required and follow up
- Access to priority service and advice

Call **Bruce** on **0357295511** or mobile on **0427852925** [if on the road]

Looking forward to hearing from you
