

polytec

THERMOLAMINATED vinyl doors & panels

Create your look

Polytec's beautifully crafted range of **THERMOLAMINATED** vinyl doors and panels will add character and opulence to your home. From the elegance of sleek minimalism through to the traditional look of country style doors, **polytec** can supply a style that will suit your kitchen design.

THERMOLAMINATED vinyl doors and panels are made from 18mm moisture resistant MDF, formed on the face and edges with a durable and decorative

surface. The result is a stylish fully profiled door with an excellent resistance to impact. The thermoformed surface makes it resistant to all the usual knocks and bumps of a busy household. Your kitchen will remain a showpiece for years to come.

Polytec timberprint doors have matching matt melamine backs excluding the Studio Range. This unique feature enhances the natural and realistic look of the timberprint design.

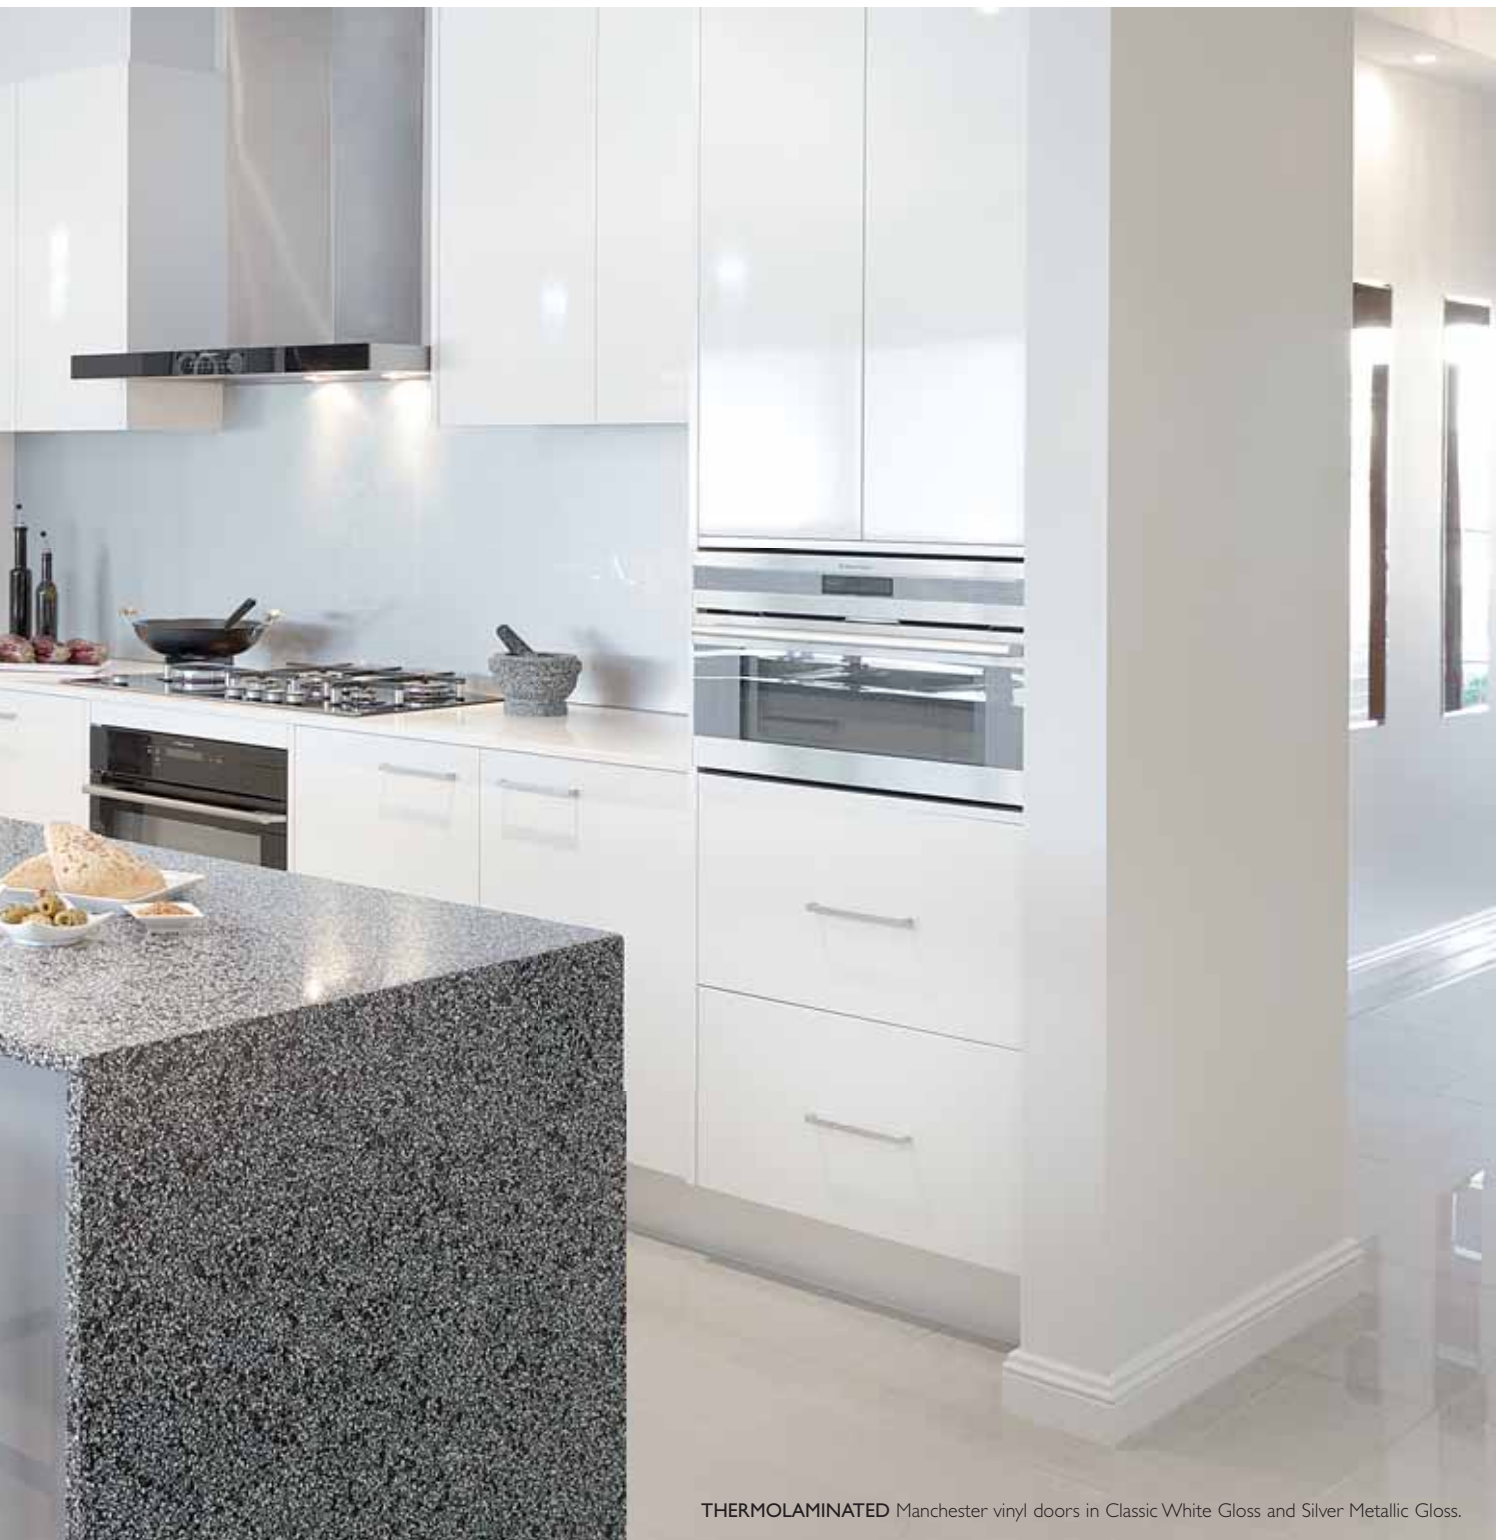

THERMOLAMINATED vinyl doors and panels are offered in a comprehensive range of colours, profiles and surface finish options. Our stunning gloss finish is available in both solid colours and timberprints which are a classic choice in today's modern kitchen design. All surfaces, being non-porous and easy to clean, will retain their beauty for years to come.

THERMOLAMINATED vinyl doors and panels are designed to be complementary. This makes it

easy to co-ordinate your favourite shades and finishes with **polytec's LAMINATE** and bench top range, **MELAMINE** doors and panels and **ALUMINIUM** framed glass doors. **Polytec** colours and finishes work in harmony with each other and allow you to create a fashionable kitchen that is right for you.

Stylish, functional and simple, **THERMOLAMINATED** vinyl doors and panels are suitable for any internal

joinery application including vanities, wardrobes, custom built furniture, storage units and laundry cupboards.

Our 7-year warranty on all **polytec** manufactured doors ensures against workmanship and manufacturing defects, giving you complete peace of mind, quality and value when choosing **THERMOLAMINATED** vinyl doors and panels.

door frames

Polytec's **THERMOLAMINATED** vinyl door frames will give your kitchen cabinetry an open, spacious feel and provide a unique display area to show off much loved ornaments or kitchen accessories. The addition of either square or arched colonial frames will provide a more traditional look to your kitchen design and add a point of difference to the room.

When using frames the use of **MELAMINE** colours on the inside of your cabinets will ensure a consistent look throughout your kitchen.

SHELVING

Open shelf unit with Federation Capping

Polytec helps you integrate shelving units into your kitchen by providing **THERMOLAMINATED** vinyl panels in matching colours. Shelving in your kitchen is another way of re-styling your kitchen, as ornaments and books can be rotated to evoke different moods and styles.

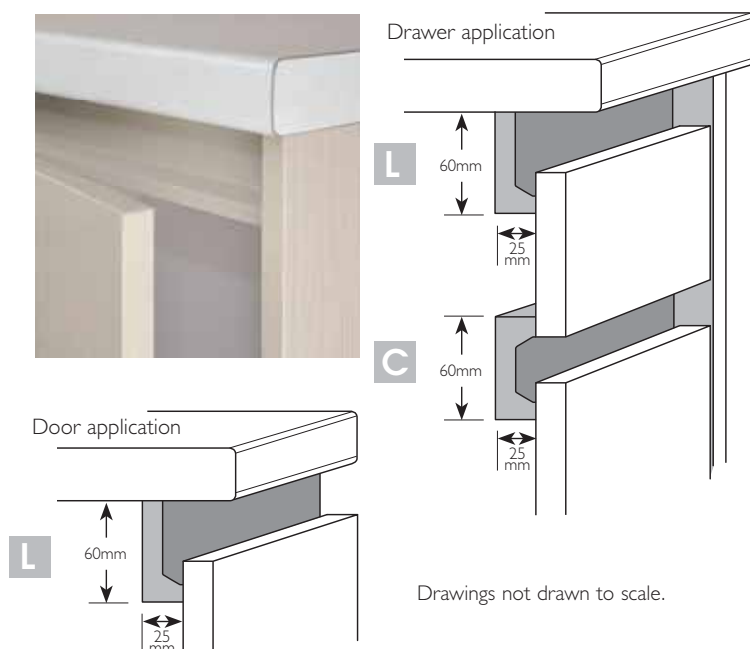

RECESSED RAILS

HEAT DEFLECTOR

Flush mounted ovens are often not designed to deflect heat away from surrounding surfaces. **polytec** offer metal heat deflector strips for use where such ovens are alongside **THERMOLAMINATED** vinyl doors and panels. Please note that if heat deflector strips are not used, warranty will be void.

Minimalist and handle-free doors and drawers are the latest trends in kitchen design. To create a modern space with flowing horizontal lines **polytec** now offer a range of recessed rails to match our **THERMOLAMINATED** vinyl doors and panels.

ROLLER SHUTTERS

Roller Shutters provide handy storage for bench top appliances, that can be easily accessed as required, or quickly concealed to keep your kitchen neat and tidy.

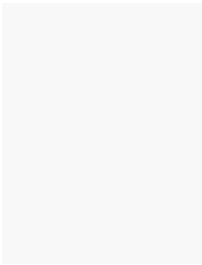

DRAWERS

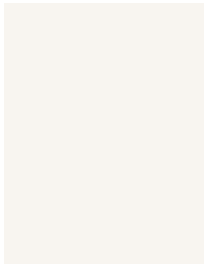

Polytec manufacture drawer banks in a range of styles to suit the profile of your doors. For a traditional look choose individual drawers to enhance the crafted look of each panel. For the more contemporary integrated look choose a drawer bank style that matches the adjoining doors.

The colours and details shown in this brochure are to the highest standards in printing. However; they should only be used as an indication of actual product colour. To order your free colour sample visit www.polytec.com.au

The use of our current colours samples gives the colour and finish that a customer would expect to receive. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.

Your **THERMOLAMINATED** vinyl doors and panels are manufactured from the highest quality materials and designed to provide years of trouble free service.

Whilst your doors are made from a Moisture Resistant Medium Density Fibreboard (MR MDF) and as with many wood based panels they are not waterproof, care should be taken to wipe up spills immediately ensuring the doors are not exposed to high or continuous levels of moisture, steam and humidity.

THERMOLAMINATED vinyl doors and panels should be cleaned as follows: Wipe down using a white damp soft cloth with warm soapy water. For more stubborn stains use a mild household cleaning spray and always ensure that you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you will be sure to retain a beautiful kitchen surface for many years to come.

THERMOLAMINATED Manchester vinyl doors in Grey Oak Natura
