

HE CUSTOM GARAGE DOOR SPECIALISTS

Is there a particular style or feature that you have not seen in the huge range of CB Garage Doors? You may have a specific design feature, profile, colour, style or material in mind, or some physical requirements which a standard garage door cannot satisfy. A custom designed garage door may well be the answer!

FRAME OPTIONS:

Half 50/50

^{*}There are additional layout designs, available upon request.

^{*}Number of panels high is determined by the size of the opening $\langle 2440H = 4 \text{ panel } \rangle 2450H = 5 \text{ panel.}$

^{*}Some frame layouts may not be available with certain inserts due to limitations in sheet lengths.

INSERT OR FACE FIXED OPTIONS

Multi Wall – **MULTILITE** polycarbonate sheeting. Lightweight with unrivalled strength and durability.

The multi-walled nature reduces heat, is UV rated and is translucent.

Perfect for allowing natural light into your garage without compromising security.

Solid Poly/Acrylic

Solid Wall Polycarbonate - CLEARLITE

Strong, translucent, UV protected solid Polycarbonate sheets.

Perfect for natural light with next to no visibility into your garage. Combined with lighting in your garage, this can become a prominent feature of the home.

Aluminium Composite Panel

Aluminium Composite Panel - ALIPANEL

2 layers of aluminium sandwiching between a non Aluminium core.

This product is generally face fixed to the frame – leaving a 10mm negative detail as a feature.

CB Garage Doors have the facilities to make most; if not all custom made doors. If you have an unique request, please contact your representative.

4 Easy steps to selecting your custom designed garage door
