

DecoTek Privacy Window Films

The Perfect Match

Affordable Privacy and Design

DecoTek's stylish Dusted and Frosted Crystal window films deliver a competitively priced alternative to popular sand-blast privacy and graphic solutions.

These high quality translucent vinyl films seamlessly adhere to glass and are ideal for customizing any space - creating privacy, defining areas, disguising less attractive features or providing graphic impact. And by allowing in soft light, rooms feel bright, but glare-free.

Applied to interior glass windows, doors and partitions, DecoTek window films are the ideal design solution for large panel installations – or for plotter-cut logos, signage and patterned graphics. And with vibrant colors easily printed using screen print, UV solvent and other digital processes, films deliver a powerful visual impact at a truly affordable cost.

DecoTek Dusted Crystal

- High quality 2 mil low-gloss vinyl film
- Uniform translucent matte surface for optimized acid-etch finish
- Quick release polyester liner with acrylic adhesive for easy handling and plotter-friendly processing

DecoTek Frosted Crystal

- High performance 3 mil low-gloss vinyl film
- Distinctive blend of colored pigments and metal flakes that create a sparkling translucent effect
- Quick release polyester liner with acrylic adhesive for easy handling and plotter-friendly processing
