Stan Bond history, SA owned quality

"Stan Bond started manufacturing flyscreens and doors in Adelaide in 1970. Since then we have grown to become one of South Australia's best known suppliers of home improvement products with a range that includes blinds, awnings, shower screens, wardrobes and security doors.

Since 2010 the company has been managed by family members of the original owners, who still believe in putting the customer first. We make everything we sell and this has given us a real edge in the marketplace by delivering consistent quality. Our national buying strength ensures competitive pricing.

We strive to bring our customers the latest in styling and design so that our products not only look beautiful in your home, but make life easier and more comfortable too. Stan Bond is a name South Australians trust because we offer product excellence, together with the care and support of a local company. Help us celebrate our 40th Anniversary by inviting Stan Bond to quote!"

Act now, beat the heat

Folding Arm Awnings

Extend your outdoor living areas with a Folding Arm Awning to shade your terrace, patio, courtyard, balcony or over large floor-to-ceiling windows. Adjustable pitch allows you to change the angle of your awning from almost horizontal to vertical, without obstruction from posts or beams. With Stan Bond's huge range you have the option to fully retract into a sleek cassette, manually operate or be easily automated.

Send us your floor plan for a free quote...

Auto Guide Awnings

Auto Guide Awnings are one of Stan Bond's most popular outdoor blind systems. They can be raised and lowered to any position by sliding the arms on the guide rods. Covers the entire window to offer sun protection from any direction. It's simple, robust design, does not project far from the wall, so if a path or driveway is close to the window, the awning will not obstruct access. The auto-locking arms are available in various projections; the greater the projection the more ventilation. Choose from a wide range of durable fabrics in solid colours, canvas, mesh or stripes, engineered to last in Australia's harsh conditions. Stan Bond has access to the latest fabric ranges from around the world.

WALL SWITCH
MOTORISATION
ON EXTERNAL
AWNINGS*

Motorisation

For push button convenience, you can have your blinds or awnings automated to operate from one central control; from your lounge chair or the comfort of your bed. In rooms with multiple windows, this means you can open and close all blinds simultaneously. We can fit Stan Bond's 'Intelligent Motor System' at the time of installation. For outdoor applications we can add heat and wind sensors that let your blinds think for themselves, protecting your home from the elements.

Straight Drop Awnings

Stan Bond's Straight Drop Awnings are ideal for enclosing pergolas, verandahs and entertaining areas. Available in canvas, mesh or clear and tinted PVC, you can protect from the wind, rain and sun. Stan Bond's latest technology, Outlook Mesh, offers fantastic wind and rain protection with 95% block out, without compromising your view, many colour options available. Control mechanisms include cord, spring, crank gearbox or motorised.

*We deliver on quality and price,
South Australia is our showroom!*

*Beautiful window fashion.
It's a 40 year tradition*

Roller Blinds

Also known as Holland Blinds, our Roller Blinds are practical and affordable for the home and office. Versatile enough to meet any design theme or insulating requirements. A large range of fabrics and colour-coordinated accessories can achieve the perfect look. Choose from plain or fancy trims, with traditional spring-loaded or easy-to-use chain drive operation. For the ultimate in modern living, they can be motorised and operated using remote control, switch or timer controls.

Vertical Blinds

Stan Bond's Vertical Blinds (also known as Louvre Drapes) offer elegance and practicality. Vertical technology has existed for many years but modern colour and control options make them a contemporary product, offering flexibility and practicality like no other. They can be drawn back away from the window or tilted to increase or reduce your view and privacy. The blinds can be either opened from the left, the right, the centre or may be centrally stacked.

Roman Blinds

Make your home look like a display home with luxurious Stan Bond's Roman Blinds. The soft fabric panels can be drawn up or down; offering good light, glare and temperature control. They give a plush, well-appointed feel to any room. Translucent or block out fabrics let you custom the degree of privacy offered.

Venetians

This style is one of the most functional and enduring blinds in the Stan Bond's range. With a simple twist you can control the light, view and temperature. Can be fully raised, with water resistance that makes them ideal for wet areas. Manufactured from either high quality anodised or powder coated aluminium finishes.

Stan Bond only uses quality components, and manufactures to the local market.

Honeycomb Blinds

Honeycomb Cellular Blinds are rated as one of the most efficient interior blind styles for insulating your home from heat and cold. The honeycomb shape creates pockets of air that helps regulate room temperature. Select from a cordless or corded control system. Available in wide range of colours and finishes.

Roller Shutters

Stan Bond's Roller Shutters reduce heat, light and noise, providing significant energy savings. Sunlight and harmful ultra-violet rays are prevented from fading and damaging your carpets, interior furnishings, paintings and window frames. Popular with shift workers, parents of small children, and home entertainment theatres where complete light control is needed to create that true theatre experience!

Crimsafe® Security Doors

Stan Bond's is a licensed manufacturer of Crimsafe® Security products including Security Doors, Window Screens and Safe-S-Cape®. Crimsafe® is no ordinary security system product; it is a highly developed combination of Structural Grade 304 Stainless Steel Mesh screw clamped into a strong frame. Every Crimsafe® Door is manufactured to produce a vice-like grip on the 304 Tensile Tuff® Security Mesh, which is inserted between two pieces of serrated metal with tamper-proof (resistant) screws put through the mesh and frame. Other competitor doors fasten the mesh with a wedge forced in under pressure or even just glued into place. The difference in performance between a Crimsafe® screen and an ordinary security mesh product is huge. Crimsafe® actually repels the physical assault that a burglar or intruder would apply and Crimsafe® resists attempts to cut through it like no other security screen. If you want security, buy Crimsafe®!

** Independent Tests conducted by UNSW@ADFA April 2009 (University of New South Wales' School of Aerospace and Civil and Mechanical Engineering at the Australian Defence Force Academy) * The Australian Standard 5039 / ASS041:2003 - Methods of Test - Dynamic Impact Test calls for 5 x impacts at an energy level of 100 joules.

We're celebrating delivering quality and price in Window Fashion for 40 years!

Security doors

Stan Bond offer a range of security doors for additional home protection and peace of mind. Hinged Grille Security Doors offer custom made protection while allowing fresh airflow into your home. Made from specially tempered aluminium for greater strength, 3-point hinging is standard. Can be keyed alike to your existing doors (if compatible). Good looks, low maintenance and peace of mind!

Stan Bond's Decorative Cast Panel Doors offers the option of personalising the appearance of your home, whilst still achieving security and privacy. Strong and durable, gravity die casting means that rust will never be a problem. Sliding Security Doors include a deadlock and feature adjustment screws that face inside the door, out of an intruder's reach.

Shower Screens

Stan Bond's shower screens are custom made to suit your bathroom featuring Australian Award winning design. You are assured of easy maintenance and cleaning for years. Offering beauty and strength, choose from framed or semi-frameless styles in a variety of finishes. Enduroshield application makes grime, dirt and soap scum easier to clean, reducing cleaning time by up to 90%.

Plantation Shutters

Beautiful and practical, our Plantation Shutters are made with strength to last a lifetime. An ideal choice for windows and doorways, there is a wide range of coloured and stained timber finishes available including Western Red Cedar, Basswood and UV resistant PVC. The clean lines are well suited to modern living. Light and ventilation control can be achieved through opening and closing the louvres, tilting the blades to your privacy level. Choose from Hinged, Bi-fold, Slide or Fixed options.

Wardrobes

Stan Bond's Sliding Door Wardrobes answer your storage needs with clean, elegant lines. Our low-profile bottom track is designed for smooth, soft operation. Years of effortless use are ahead of you! Made to your individual requirements and suitable for either wall-to-wall or corner return installation. We also offer a range of internal layout options for new or existing 2 door, 3 door or 4 door wardrobes.

Panel Glides

The Stan Bond Panel Glide system offers privacy and sun protection over large expanses of glass, hinged or sliding doors. It is well suited to minimalist decorating styles and often used in conjunction with Roman Blinds on windows. Comprising of flat fabric panels that attach to a simple head rail system using roller-mounted carriers, the fabric panels can be drawn sideways, sitting neatly behind each other, using either a cord or wand operating system. When drawn to the side, they allow access through a door. Easily operated and moved out of the way for access areas, panels can be replaced if damage occurs or updated when fashion trends, colours or individual tastes change.

Zipscreens®

Zipscreen® is a next generation track guided blind system designed to be a modern shading option for windows or to close in verandah areas. Available in either easy to use spring or motor operations the Zipscreen® is a functional and stylish addition to your home. It's next generation features include a tapered top tube to ensure a smoother skin, hidden zipper which avoid UV issues and a slimline 120mm fully enclosed headbox. The Zipscreen® product can be made up to 5 metres wide and 4 metres tall ensuring most opening can be covered without the need for a central post.
