AFTER HOURS

PLUMBING ELECTRICAL AIR CON

MORE THAN JUST 9 TO 5

Isn't it always the way... your toilet blocks up when you have guests over on the weekend. Perhaps you lose all power in your home on a hot night after work. Maybe your air conditioner packs up on you when you've got guests over on Christmas Day. Whatever the situation, it always seems to be outside of a normal 9 to 5 work day that you need a plumber, electrician or air con technician.

So we've listened, and are thrilled to introduce you to the After Hours family.

When you call on the services of After Hours Plumbing, After Hours Electrical or After Hours Air Conditioning, you can trust in the expertise of our experienced and fully licensed technicians to get the job done right. From new installations or system replacements, to scheduled maintenance and urgent repairs, we can get your home running effectively and efficiently. And we can do it when you need it, whether it's before or after work, over the weekend, or even on a public holiday!

SAME RATES 'AFTER HOURS'

*Unlike many other service providers, a call for an After Hours technician won't set you back any more after hours than for a call out during standard business hours. Weekends and public holidays included. We understand that emergencies and unexpected situations don't keep to a tidy 9-5 schedule, so why should you and your household budget be penalised when it does happen? Eligible customers can also take advantage of our interest free** payment terms that make those unforeseen emergencies just that little bit easier to deal with.*

After Hours plumbers, electricians and air con technicians understand that time is of the essence when it comes to breakdowns, faults and other emergencies in the home. It's why we always aim to be at your doorstep within 30 minutes - weekday or weekend, day or night.*

Gold standard service at a time that suits you; that's what you'll get when you call After Hours. From scheduled appointments to urgent emergencies, we're here for you.
