

GLASS BOTTLE RECYCLING

Glass bottles are commonly found in three colours: clear, brown and green. All impurities must be removed before recycling as even small amounts can cause the glass to be rejected from the recycling process. Recycling glass saves on raw materials plus the energy needed to initially melt these raw materials down.

If your glass bottle does not qualify for the CDL refund, we may still be able to pay you a small refund.

We do not accept certain glass products:

- Light globes
- Oven-proof glass
- Mirrors
- Drinking glasses
- Window and windscreen glass
