- Concealed fix flat pan profile
- Self spanning up to 1500mm
- Fully structural – no substrate required
- Genuine 325mm wide pan profile
- Suitable for roofing down to a 1° pitch and cladding applications

# TRUE OAK SERIES OF CORRUGATED

True Oak Corrugated is the first new advance in corrugated roofing for over 70 years. The revolutionary new rounder and deeper profile of the True Oak series corrugated is strikingly different to the shallow v-shaped profile of standard corrugated. The superior strength, using patented technology from Revolution Roofing allows True Oak corrugated to withstand the strongest foot traffic from solar installations and various trades.

The True Oak series of Corrugated is available in three exclusive new sizes:

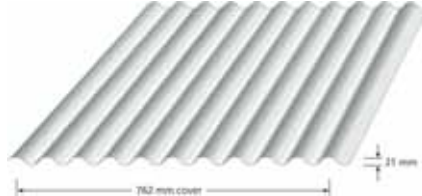

## TRUE OAK 'MID' 10mm Corrugated

- Suitable for walling, ceiling, verandah & canopy applications.
- 60% deeper & 100% stronger with twice the area for fixing than standard miniature corrugated.
- New horizontal walling opportunities, superior laps & wider spanning capabilities.

## TRUE OAK 'DEEP' 21mm Corrugated

- Suitable for roofing, walling & fencing applications
- Minimum roof pitch of 3°.
- 40% deeper & 40% stronger than standard 16mm shallow corrugated.
- Curving opportunities available.
- Profile is much stronger underfoot and less susceptible to denting by foot traffic.

## TRUE OAK 'Super 5' 35mm Corrugated

- Suitable for roofing, walling & fencing applications
- Minimum roof pitch of 2°.
- 60% deeper, 50% more water carrying capacity & 100% stronger than 16mm corrugated.
- Contemporary cousin to the original deep 6" asbestos profile.

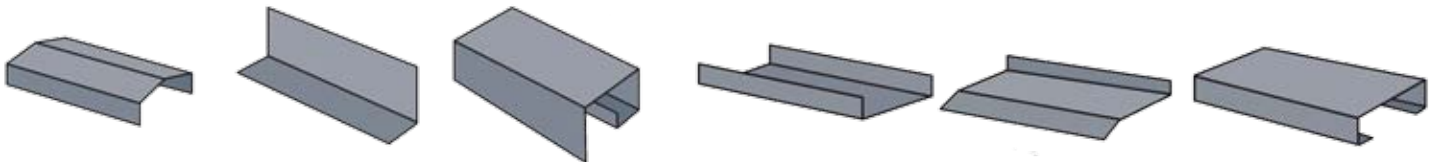

At Revolution, we are so sure the True Oak Corrugated will stand the test of time we are willing to back it up with an exclusive True Oak 20 Year Watertight Installation Guarantee when installed by a Revolution Roofing Licensed Contractor.

## FLASHINGS

We have at Revolution Roofing, Adelaide's newest folders and slitters to manufacture your perfect flashings and cappings each and every time. New machines mean consistent accurate folds up to 8m long. We understand that the flashings and cappings add the finishing touch to your project, which you need on time, that is why our slitting lines are operating 24 hours a day.

We understand your needs so with our instant flashing service there are no gimmicks ... just a genuine service where you order your flashings and we make them while you wait. Not to mention the quick and easy pick-ups from our convenient central location.

# CURVING

At Revolution Roofing we are pleased to provide a range of traditional and custom curving to offer you and your clients freedom in design. With the capability to curve to all the traditional heritage shapes, our unique curving machines and experienced curving staff are equipped to meet the demands of the building industry.

With our new fully computerised curving system, we can achieve the tightest of curves that match our machine corrugator perfectly providing an accurate and seamless finish.

# MOBILE MILL

Revolution Roofing also offer the option of the Mobile Mill with the concealed fix deck Rev-Klip 700. The Revolution Roofing Mobile Mill option is more economical, faster than transporting ready made sheets and minimises handling and damage to your product. The Revolution Roofing Mobile Mill option is a viable alternative to other methods used by trades and manufacturers. Call us today to find out what lengths we can go for you.

# MATERIALS & FINISHES

Proudly using nothing but the best, 100% BlueScope Steel, Revolution Roofing provides a wide range of materials and finishes to complement your next project.

Offering versatility and peace of mind with our wide range of classic and modern COLORBOND® steel, ZINCALUME® steel and Galvanised Steel, which is available in 0.40, .42 and .48 BMT. Revolution Roofing also offer superior materials such as Stainless Steel, COLORBOND® Ultra and Heritage Galvanised Z600. Ask our friendly staff for more information.
