## SATINJET® TECHNOLOGY

### The trusted luxury spray

For over 10 years the multi award-winning Satinjet® technology has set the standard as the ultimate water saving spray that delivers arguably the best feeling shower experience.

It's the unique Satinjet® technology that sets us apart from conventional showers. Conventional showers use single jets of water that can produce a narrow, needle-like spray. Satinjet® uses twin jets of water that collide and turn into thousands of tiny droplets that feel soft enough for your face, yet provide a strong cleansing for your entire body.

Satinjet® showers meet the strictest water conservation requirements worldwide without compromising your shower experience. Switching to a 9 litre per minute Satinjet® shower will still feel every bit as luxurious as a full flow shower and when compared to conventional showers, the savings are exceptional.

It's easy to upgrade your bathroom with a Satinjet® shower, even if you're not planning a full rebuild or renovation. The fittings on most shower outlets are universal so in most cases you can simply replace the existing shower with a modern Satinjet® shower rose or handset.

Turn an everyday ritual into a luxurious experience.

	Per shower	Per day	Per year
Satinjet® 9L p/min	45L	180L	65,520L
Satinjet® 7.5L p/min	37.5L	150L	54,600L
Conventional showers 22L p/min	110L	440L	160,160L

Installing a Satinjet® shower can save 50+% water and energy consumption in the bathroom. Satinjet® saves the family of four over 100,000 litres of water & \$100\* + off energy bills per year.

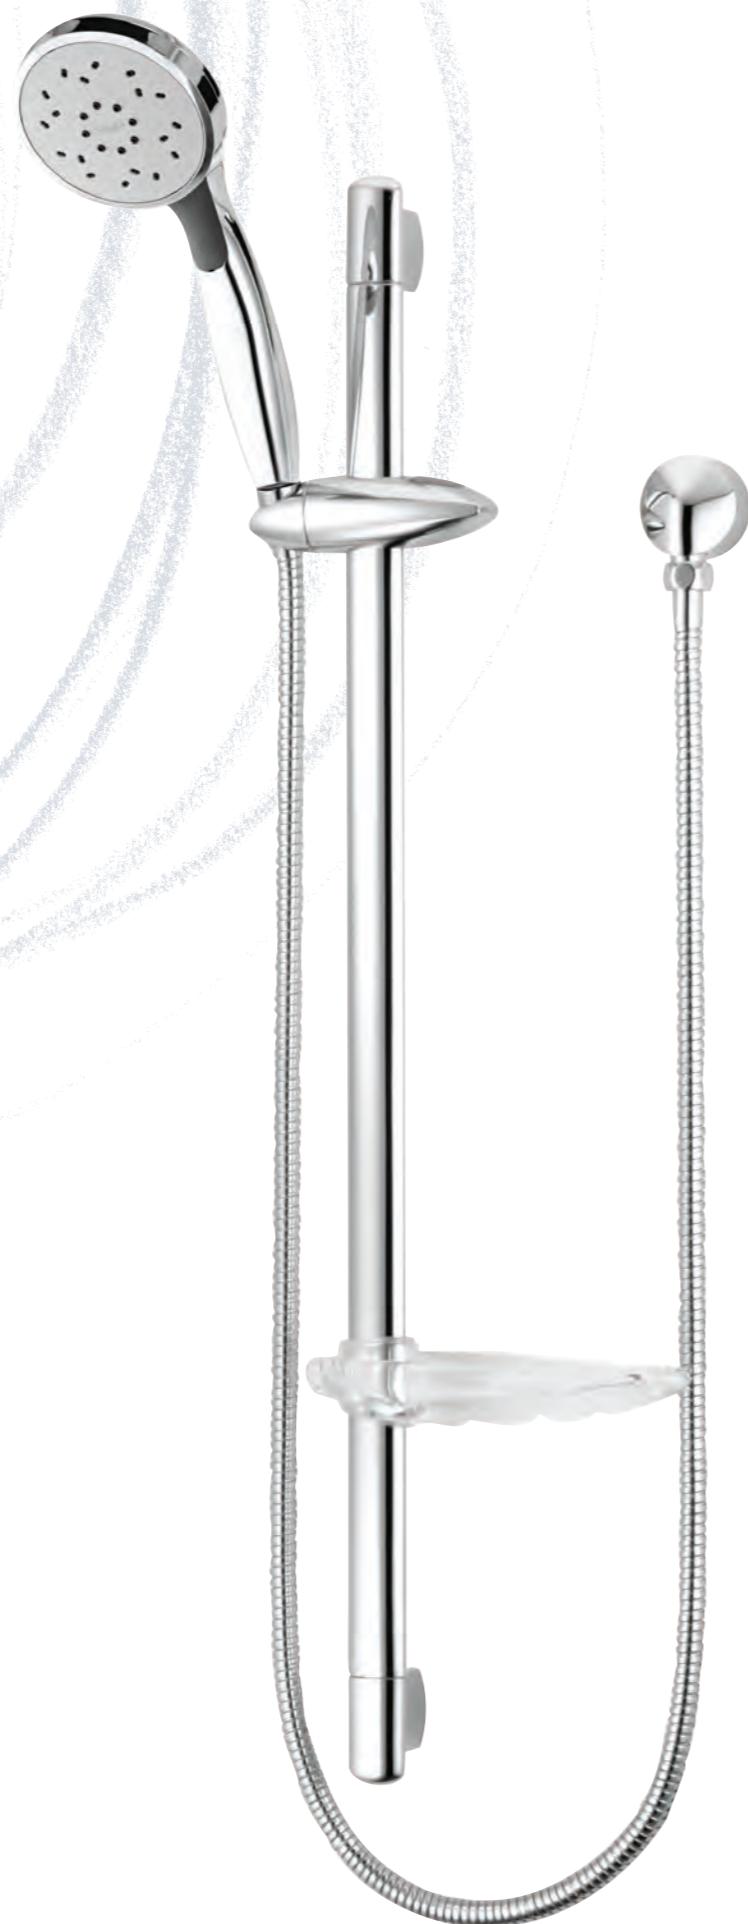

\* Based on a 5 minute shower for a family of 4. Energy savings vary according to gas or electric water heaters.
