

THE TECHNOLOGY OF TOUGH

**NEW DUELER
M/T 674**

Bridgestone has redefined the limits of extreme off-road performance with the new Dueler M/T 674.

Created using revolutionary new 3D technology, the M/T 674 takes off road performance and durability to a whole new level.

Made for mud

The M/T 674's aggressive tread design features 3D grooves that cut through mud and shoulder lugs that self-clean the tyre as you drive. Together they deliver unprecedented levels of traction and control in heavy mud.

Lasting performance

With its innovative tread design and 3D technology, centre wear on the M/T 674 has been dramatically reduced, delivering extended tyre life.

Built tough

With its light truck casing construction, reinforced upper sidewall and chip and cut-resistant rubber compound the M/T 674 will take on the most demanding of off-road challenges. And because it's a Bridgestone, you know you're in safe hands.
