Waterproof Shading

Family Owned

Shadeform is a family owned and operated business with all measuring, design and manufacture taking place at our Flinders Park factory. The Soulsby family, with over 20 years knowledge and experience from their previous sailmaking and yacht chandlery background, have been specialising in the shade sail industry since 1996. Our 10m x 3m state of the art flat bed computer cutting table enables us to produce the smallest to the largest project with ultimate accuracy. Sail panels are then High Frequency welded together (certain fabrics) to avoid UV breakdown of stitching.
