POWRTOUCH - CARAVAN MOVERS

Dorset Powrtouch is now the UK's number one manufacturer and supplier of caravan moving systems. They have out-sold all other mover suppliers in recent years as more and more customers realise the value for money and peace of mind.

UNRIVALLED DESIGN AND MANUFACTURING EXPERTISE

Working to ISO 9001 engineering standards, their fully skilled and trained workforce boasts over 30 years manufacturing experience, of which 20 years includes the design, manufacture and supply of caravan movers. Comprehensive quality auditing of products by Powrwheel in their factory means Dometic can offer you the finest quality systems at very competitive prices.

Powrtouch's supreme confidence in its products is reflected in an unbeatable three year no worries parts and labour warranty. In the extremely unlikely event of a product failure, you can rely on our world-renowned after sales and support through a nationwide service network. So whether you are at home or on holiday, Dometic has you covered.

An advanced electronics control system designed using state of the art technologies ensuring that remote controlled operation is extremely smooth and effortless.

Mechanically sturdy but still a lightweight system with included Powrbar for cross actuation. No breakable plastic covers that will retain dirt, condensation and water which can also disguise potentially poor quality engineering.

HOW IT WORKS...

The Powrtouch can easily move and position your caravan or trailer in any direction (even 360° with single axle vans) on a level surface. The hand held remote control unit communicates by radio signal with a receiver unit mounted inside the caravan. This will give you precise control of the movements and enable you to move the caravan or trailer right onto the tow ball of your vehicle. Braking is instant with the release of a button.

The Powrtouch Heavy Duty mover is designed and built with a reduction gearbox to provide maximum moving power to the caravan wheels.

The Powrtouch All Wheel Drive Twin axle caravan mover drives all four wheels of the caravan. This allows for it to be used on slopes up to 1 in 4 turning on a slope and over uneven ground. This model will fit the majority of all twin axle caravans. The All Wheel Drive unit is comprised of two Powrtouch units which are positioned both in front and behind the caravan wheels and which are wired to work simultaneously.

**3 YEAR
WARRANTY**

POWRTOUCH SINGLE AXLE WITH POWRBAR

The competitively priced 'Powrtouch Heavy Duty' mover is designed and manufactured for single axle caravan. Suitable for up to 1 in 4 slopes.

Includes: Powrbar cross actuation system.

Number of axles	1
Weight of unit - complete	40 kg
Minimum battery capacity required	85 Ah
Laden caravan weight (flat surface)	2000 kg
Laden caravan weight (1 in 4 slope)	1500 kg

POWRTOUCH TWIN AXLE ALL WHEEL DRIVE

The specially designed 'Powrtouch All Wheel Drive' mover is the ultimate twin axle caravan system that will move twin axle caravans by driving all four wheels. This provides the most effective turning available and is suitable for all terrains and most gradients.

Number of axles	2
Weight of unit - complete	78.5 kg
Minimum battery capacity required	110 Ah
Laden caravan weight (flat surface)	3500 kg
Laden caravan weight (1 in 4 slope)	2250 kg

Powrtouch, twin axle	Model 5 T KIT

FEATURES, BENEFITS & ADVANTAGES

- Excellent flexibility of movement and caravan control with 4 speed control settings and the ability to turn the caravan whilst still in motion (i.e. no need to stop the caravan to turn to a different direction).
- TUV Approved.
- Intelligent design to give maximum ground clearance on all caravans.
- Ability to work up to 1 in 4 gradient slopes.
- Unique sensitive soft start to allow millimetre accuracy in caravan positioning.
- Designed and Manufactured to ISO 9001:2000.
- Operates efficiently in a range of environments, including gravel and soft surfaces.
- Heavy duty design suitable for Australian single and twin axle caravans using 6 and 10 mm plate construction.
- Two low battery indicator lights on the handset (one for the handset battery and one for the caravan battery).
- Powrbar cross actuation allows both rollers to be engaged or disengaged from one side of the caravan.
- Included back up cable can be used, should radio interference be experienced with remote.
- Corrosive resistant materials, electro-plating and epoxy paint systems are used to prolong life.
- Easily transferable to a new or upgraded caravan.

SAFETY FEATURES

- For additional safety there is an automatic 20 minute power cut off should the isolation switch be in the on position and the Powrtouch not operated - use isolation switch to reactivate.
- For your safety a unique isolation switch is fitted to the caravan to prevent accidental use of the Powrtouch and to prevent battery drain when not in use.
- Unique two button switch on handset to prevent accidental activation.
- Built in motor overload protection (current and temperature).
- Automatic braking occurs immediately the buttons are released.
