

# The Marble Man

Your Stone Restoration Specialist

**12**  
TIPS

## Maintaining your Granite Benchtops

- 1** Have natural stone benchtops professionally sealed by 'The Marble Man' to prevent staining. Our penetrating sealers last for around 15 years.
- 2** Use only PH neutral cleaners such as our 'SP cleaner'. Your much better off using products designed for stone surfaces as they won't remove the sealer. Use of our 'SP Cleaner' will reduce streaking and finger prints and conditions the sealer making it longer lasting.
- 3** Cleaning glossy surfaces is like cleaning a mirror and therefore require being wiped dry to prevent leaving streak marks.
- 4** Don't place any acids and strong cleaning chemicals on your stone benchtop as these may dull or discolour the benchtop.
- 5** Don't spray oven cleaner on any stone surface as it will remove the colour and reflection from the stone.
- 6** Don't use green scourers or other abrasive cleaners on your benchtop as this will dull the reflection.
- 7** Don't use polishes like 'Mr Sheen' as they form a buildup on the benchtop, which makes it harder to keep clean.
- 8** Don't leave hot pots on your stone benchtops as they may cause it to crack and discolour.
- 9** Don't cut directly on granite benchtops (bad for benchtop and knife)
- 10** Keep people from standing or sitting on your benchtop. This can cause cracking of the benchtop, which will need repairing.
- 11** Don't leave liquids and other materials on the surface. Clean spills up immediately.
- 12** If hard materials are on the surface of granite benchtops use a fresh razor blade to remove.
