

Poly Water Tank Colours

Bushman Tanks has an extensive range of colours available for their poly Tanks which will suite the most common colours used on buildings and fences. Bushmans offer 13 core colours plus range of optional colours.

Bushmans colour range is approved to comply with AS4020 for storage of potable water.

Optional Colour Range

Bushmans optional colour range is available on request and incur a colour price premium. Delivery of these optional colours may be delayed as the colours are bought in for specific orders.

Non-Standard Colours

There are a number of applications such as industrial operations where a specific colour has a particular meaning to the customer. Where customers require a non standard colour, there are many colours available on request.

The non standard colour range incur a colour price premium. Delivery of these optional colours may be delayed as the colours are bought in for specific orders.

NB: When requesting a non-standard colour, individual colours have different specifications and approvals. The tanks are one piece so there is no weakening due to cutting and screwing. Bushmans tanks are accredited to manufacture to the AS/ NZS4766 tank standard and have stood the test of time with tanks in the field for over 30 years.

NB: Colours shown are a **guide only**, colour will vary depending on web browser, screen and printer type. For true colour representation, contact your Bushmans representative.
