

STEEL DECK SKYLIGHT

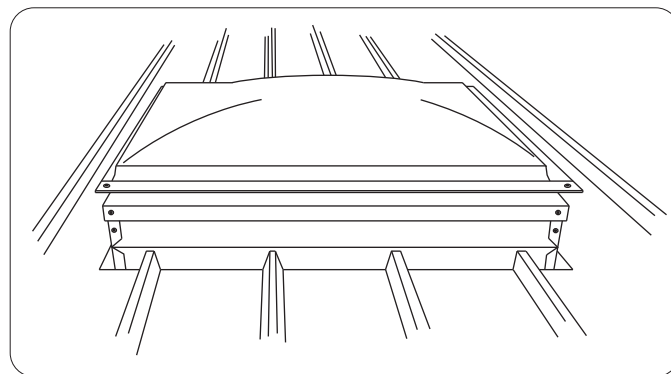

Steel Deck Skylights are generally used for flat roofs where a hob or kerb has been supplied by the builder, or is intended to be built. They are suitable for kerbs constructed out of steel, concrete or timber. Please refer to the installation guide for differing kerb types.

MATERIALS

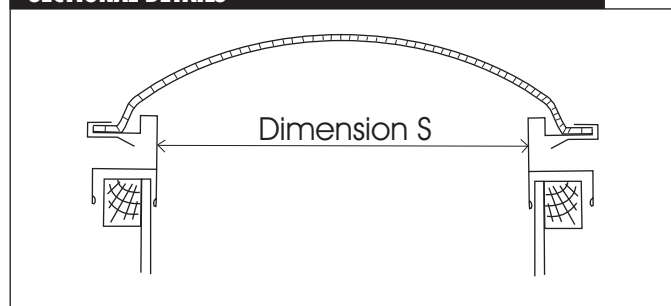

Standard Steel Deck Skylights consist of a kerb style fabricated Zincalume base and an acrylic dome. Special bases are available (in stainless steel, aluminum, copper and galvanised) to meet individual customer requirements. Domes can also be manufactured from standard acrylic and polycarbonate, in clear, opal or tint finishes.

OPTIONAL ACCESSORIES

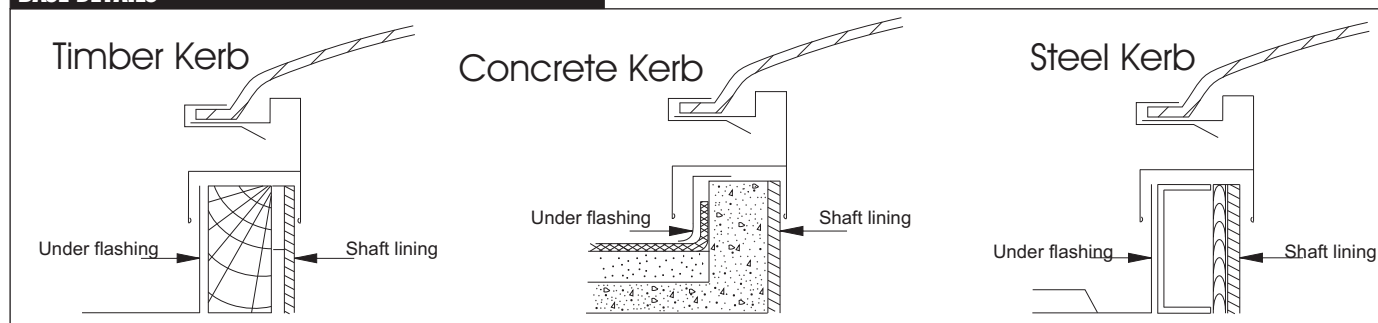

Regent Skylight Systems offer a large range of accessories and spare parts to compliment your natural lighting needs. For advice on selection, refer to the accessories information sheets or consult your local distributor.
