

Leaking Taps & Cisterns

30 September 2016

Ever try to fall asleep while the tap from the next room is steadily dripping? Dripping faucets can do more than just aggravate the life out of you, especially if you are trying to sleep!

It can also hit you deep in the wallet when it comes time to pay your water bill. Just one leaky faucet can cause thousands of gallons of water wasted down your drain in a year's time.
