

Invisalign

Get the beautiful smile you've always wanted.

The thought of braces normally fills people with fear. The image of metal on teeth is highly visible. Now with Invisalign, you can go invisible.

Invisalign is the new, invisible way to straighten teeth, using a series of custom-made, nearly undetectable aligners. Whether your teeth are crowded, too far apart or have shifted, you'll have new reason to smile. It's painless, comfortable and simple. The latest technology makes it possible.

After we have carefully, and precisely, taken an impression of your teeth, the results are submitted to Invisalign. Invisalign translates our instructions, using the latest advances in 3-D computer technology, to create a series of custom made aligners. You wear each set of aligners for about two weeks, which move your teeth gradually, millimetre by millimetre, until you've achieved the intended result: Straighter Teeth. We will closely monitor your progress to ensure you receive that perfect look. No braces. Nothing to hold you back.

A significant breakthrough with Invisalign - is the comfort. There are no metal wires and brackets, and the aligners are easily removable. Eating, brushing and flossing are no problem, compared to the days of chunky metal braces. You can still enjoy your favourite foods and smile with confidence.
