 \*\* Due to product improvement, product specification is subject to change without prior notice

Scramble code

#### Tailored Flexibility

The E-Flash EF680 is an ideal digital door lock for residential purposes. The E-Flash EF680 is not only stylish in design but is also simple to use, with its built in voice guide function. The EF680 eliminates the need for keys with the simple to use digital touch pad and allows easy registration of pin code or proximity card. With its modern stylish design the EF680 is available in two colour choices - white or black. Optional wireless door remote control provides added flexibility to the system.

#### Product characteristics

The EF680 provides the convenience of proximity card or password identification access. The voice guide function has a volume control and assists users to operate and set functions with ease and convenience. When the door is securely locked and an outsider tries to break into the premises by forcibly opening the door or damaging the lock a built-in trespassing/damage alarm is activated. The EF680 has an automatic lock mode with manual override.

#### Construction

The durable construction materials including steel mortice lockcase, zinc die casting front and main body with a high impact resin ensure high strength within the system

#### Applications

- Residential properties

120 Minutes
