

#### Step 2: Test Results – Determine if Asbestos is Friable or Non-Friable

Once the test results confirm the type of asbestos, we will undertake a feasibility study and consider all project requirements. This will help us in compiling your quote.

#### Step 3: Quote

You will receive a quote for your asbestos removal.

#### Step 4: Notify Workplace Health & Safety

If you accept the quote and would like to proceed, we submit a form to the government, notifying Workplace Health & Safety of the scheduled asbestos removal project. We also ensure we have all necessary work method statements prepared.

#### Step 5: Perform Asbestos Removal

Our asbestos removal team will ensure the service is carried out according to industry requirements. We use hand tools for the demolition, reducing the risk of creating dust, and wear specialist asbestos work suits for extra precaution. For friable asbestos projects, a complete decontamination unit is put in place with additional workplace health and safety processes.

#### Step 6: Perform Asbestos Disposal

All asbestos is safely transported to the Townsville City Council waste facility and disposed.

#### Step 7: Site is Cleared and Certified

Upon completion of the project, the site will be comprehensively cleared. An independent hygienist then visits the site, performs a clearance inspection and issues a clearance certificate.

location. We will ensure your home is safely and securely transported. [MORE](#)

#### Items for Resale

##### Bargains. Rare Finds. Vintage Pieces.
