PROUDLY SERVING THE ILLAWARRA SINCE 1955

Property Law

We assist our clients with the purchase and sale of real estate properties and businesses. We are accredited property law specialists and our extensive experience ensures that our advice is reliable, informed and tailored to the needs of our clients. We also advise our clients in relation to retail and commercial leases, strata and community title, mortgages and other commercial transactions.

Family Law

We provide our clients with calm, compassionate, incisive and informed advice when marriages or de facto relationships break down. Our experienced family lawyers guide clients through all aspects of family law, including arrangements for the care of children, child maintenance and support, the division of assets, superannuation and tax issues, spouse maintenance, and divorce proceedings.

Surrogacy & Adoption

There are many different ways to create families. We assist our clients through the complex areas of surrogacy and adoption by providing advice, offering referrals to other appropriate professionals and drawing Surrogacy Agreements and court applications for transfer of parentage and adoption Orders.

Wills, Power of Attorney and Appointment of Enduring Guardian

How personal and financial affairs are managed before and after death requires careful consideration. All of our experienced lawyers are able to assist our clients to properly consider the client's individual needs and to address these needs legally by preparing wills, powers of attorney and appointments of enduring guardian.

Elder Law

Elder law focuses on the needs of older people in our community. Issues such as estate planning, health and housing needs, including the consideration of retirement village and nursing home agreements, and substitute decision making require expert advice. Our clients gain a comprehensive understanding of these issues to make decisions suitable for their individual circumstances.

Public Notary

Our experienced public notary authenticates the signing of documents, witnesses the signing of documents, certifies copies of documents and performs other notarial acts primarily for use overseas.

Deceased Estates and Will Disputes

The death of a loved one is difficult without the often complex issues associated with estate administration. We inform executors and beneficiaries of their rights and responsibilities. Our expertise extends to managing the distribution of an estate where there is no will and to assisting the executors or other persons with any claims that are made over the administration or distribution of an estate.

EXPERIENCE AND PERSONAL SERVICE YOU CAN TRUST
