

## Priority Carton

Have you ever moved to a new home and felt like a cup of tea or coffee, or you need something for the children but they are in boxes the removalist team are carrying into your home or they are still on the truck?

No Need to worry about those things with "Priority Boxes"

### **Items that you may consider to pack in this carton would be.**

1. Leads and remote controls for TV's, Stereos, computers etc
2. Nuts and bolts from any item that you or your removalist may have disassembled.
3. Kettle, Coffee, Tea, Sugar, Mugs and Teaspoons
4. Small First Aid Kit for any unexpected emergencies. (This should probably contain any regular medication your family needs.)
5. Any last minute items that are found under furniture etc as you clean.
6. Any items that you may need as soon as you arrive at your new home.

It is also wise to have another priority carton packed with your children's favorite things.

Once completed, ensure that your carton/s is well marked with "Priority" and "Priority Children" and notify the removalist on the day of your move, this will ensure that your carton/s will be last on and first off when unloading the removal truck.
