## AXLES EARTHMOVING & CIVIL WORKS PTY LTD

Based on the Gold Coast, with a reputation established over 25 years, this privately-owned company with expert staff and competitive rates, provide extensive professional excavation services to South East Queensland and Brisbane for a range of clients. Axle's Earthmoving and Civil Works specialise in large contract works to small projects, in the areas of rock walls, demolition, earthworks, detailed excavation, tree clearing, drainage, asphaltting, road works and civil excavation.

From modest beginnings Grant "Axle" Donaldson started, by gaining experience, and a respected reputation as a highly skilled and innovative Excavator Operator. This experience, innovation, and a determination by Axle to provide quality services and industry solutions created demand that could not be provided by him alone as a single operator, so Axle's Earthworks and Civil Works was created. Axle's Earthmoving and Civil Works has a reputation in a range of services that are the envy of our competitors.

### COMPANY AIM

Axle's Earthmoving & Civil Works aims to provide quality services and solutions for all projects. Our fleet is constantly updated and maintain together with our team's experience ensure we have the capability, equipment and expertise to complete projects to a high standard.

## SERVICES

### Earthworks and Excavations

Axle's Earthmoving & Civil Works provides extensive excavation services to the, South East Queensland, Gold and Tweed Coasts, and Brisbane. With a Client's specific needs in mind, we quickly and efficiently clear excavation sites of all unwanted obstacles, excavate to the required level to ensure the build site is prepared to plan specifications, ready to build.

Our experience in a wide variety of earthworks and excavations give us the knowledge to complete the project to the Client's satisfaction has earned Axle's Earthmoving and Civil Works an enviable reputation and range of services that are the envy of their competitors.

### Road Construction

Road construction includes boxing out, proof rolling, removal of soft spots, installation of subsoil drainage, and importing of quarried road base materials. Compaction and testing, to achieve required finish levels including final trim for the options of concreting, asphalt or 2 coat seal for commercial and residential projects.

## Tree Clearing

Axle's Earthmoving & Civil Works provide a comprehensive range of tree services to commercial and private clients. We can manage all of your vegetation needs. These include tree Removal, stump Grinding, Land Clearing, Arborist Reports and DA Reporting, Tree and Soil Consultancy, Excavator and Elevated Work Platform, Wood chipping and Tree climbing.

We have the capability, equipment and expertise to remove logs and stump from site ready for redevelopment.

## Pipework

Axle's Earthmoving & Civil Works are experienced pipe layers having successfully completed small to large commercial and residential projects, and have extensive experience in installation of pipes of various dimensions and depths, excavation in rock, road gully pits, concrete headwalls, manhole – precast & in-situ, drainaway, GPT and storage/rain harvesting and detention tanks. Our work includes trenching, bulk excavation, dewatering, trench support systems, steel-fixing, formwork, pit building, concreting and road restoration.

## Demolitions

Axle's Earthmoving & Civil Works specialise in the safe and effective demolition of residential, commercial and industrial structures. Whether it is demolition of the old to make way for the new, partial demolitions for a rebuild, or minor demolitions for renovations to take place.

Our highly skilled team of operators can demolish a house within hours, and be working on the site clean-up. Our haulage trucks will remove unwanted materials from the site resulting from the demolition to leave the site ready for the next phase in the site's evolution.

We have the certification required, including Asbestos removal, to work in this industry, and with the right machinery to effectively, and safely carry out your demolition project. Whether it is a minor demolition or major, we have the appropriate equipment ranging from 1 – 30 tonne excavators, tipper and haulage trucks to accommodate all aspects of the demolition process.

## Asphalt Concreting & Kerbing

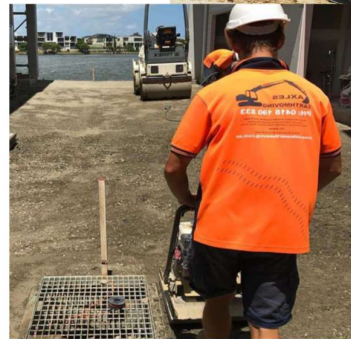

Axle's Earthmoving & Civil Works, and our dedicated sub-contractors, have the ability to complete road constructions projects including road strengthening overlay works, profile & resurfacing. Our management team ensure stringent quality assurance processes are followed through implementation of our internal policies and procedures to meet the client's expectations. Whether it be a large civil road project or simply a home driveway, we have the resources to complete your asphalt & kerbing needs from start to finish in a safe and proficient manner.
