WATER PRODUCTS

MANUAL PUMP

Davey's NEW HM, all stainless steel multistage pumps feature advanced hydraulic components and unique structural design for peak performance and dependable operation.

HM models are available with a choice of Davey's world famous motors. These Australian designed motors are engineered for high ambient temperatures up to 50°C while also being able to cope with large voltage fluctuations and pump water up to 105°C.

TORRIUM® CONTROLLED

Single phase units up to the HM160 models are available with Davey's advanced Torrium® automatic pressure system controller, allowing flows up to 200 lpm. With a choice of eight models, the HM with Torrium® is ideal for large homes through to small hotels or motels.

Torrium® is the latest advance in water pressure system controllers featuring fully adaptive pressure control and pump protection software.

PRESSURE SWITCH

Sometimes the simplest system is best for the job, so Davey offer the HM range with more traditional pressure switch control. These "P" suffix models go right through to the largest single phase model, the big and impressive HM270-25P.

Each "P" model comes complete with inlet checkvalve, pressure gauge and provision for pressure tank connection. Pressure tanks can be sized to suit the application.
