

Spotlight on The Doctor's Trucks

July 11, 2014

Picture this – you wake up on a cold winter's morning and start preparing your mind for the work day ahead of you...

"First things first" you think. "A nice hot shower" is going to kick start your day. You roll out of bed, slide on your slippers and shuffle your way to the bathroom. Sleepily you reach for the shower tap and turn on the hot water to wide open. Suddenly the shower head that was once attached to your shower wall is now sitting at your feet, and a stream of hot water is firing out of the shower and across the room. You scramble to turn off the tap while trying to avoid being hit full blast in the face by the scalding high pressure volcano that is now flooding your bathroom. Now you're thinking "That could have gone better".

So, you call a plumber who comes out and tells you that you are going to need, amongst others things - a new shower head. He has one on board, but it isn't what you wanted which means you are going to have to hop in the car and find a hardware store that stocks the one you want. Once you've found it then you must book a time for the plumber to come back to your house again to install it for you, and all the time this is costing you time and money.

Doesn't this all seem like just too much work for you? We think so and that is why we have come up with the perfect solution - a mobile plumbing showroom.

You've probably seen our trucks out on the road, or heard our ad about them on the radio, but we still get a lot of questions about what exactly is in the big trucks that our plumbers drive around in. Without having one turn up to your house for you to have a look at it really is hard to picture them, and photos just don't do them justice!

The Doctor's big shiny trucks really are mobile plumbing showrooms. They carry an assortment of plumbing fittings and accessories that mean you save time when you need a plumber out at your place. You can choose from a selection of quality fittings – and if we don't have the one that you want on board then we aim to have it delivered to you within an hour so there is no need to reschedule your appointment, or take more time off work.

And the trucks aren't only mobile showrooms. They still carry the standard range of plumber's tools and supplies - from CCTV cameras for inspecting drains and water jetters for clearing them, to the latest hot water systems and more.

We think it is a waste of our time and yours if we have to go out to your property more often than we need to so our aim is to find your problem and fix it for you in one go. It's just another thing that makes us a little different to other plumbers, and we think you will appreciate it.

So if you have a plumbing problem, a sewer that needs a solution, or even a barbecue that's not burning, then give The Plumbing and Electrical Doctor a call – because The Doctor Gets It Done!
